Introduction

NSE Indices Limited (formerly known as India Index Services & Products Limited-IISL), a NSE group company provides a variety of indices and index related services and products for the Indian capital markets.

The NIFTY200 Quality 30 index includes top 30 companies from its parent NIFTY 200 index, selected based on their 'quality' scores. The quality score for each company is determined based on return on equity (ROE), financial leverage (Debt/Equity Ratio) and earning (EPS) growth variability analysed during the previous 5 years

Highlights

- The index series has a base date of April 01, 2005 and a base value of 1000.
- Stocks from NIFTY 200 index at the time of review are eligible for inclusion in the index.
- 30 companies with higher profitability, lower leverage and more stable earnings are selected to be part of the index.
- The weight of each stock in the index is based on the combination of stock's quality score and its free float market capitalization.
- Index is rebalanced semi-annually.

Methodology

Eligibility criteria

To form part of NIFTY200 Quality 30 Index, stocks should qualify the following eligibility criteria(s).

Universe:

- Stocks should form part of NIFTY 200 index at the time of review
- Constituents should have a minimum listing history of 1 year
- Stock should be available for trading in derivative segment (F&O)

Stock selection criteria:

Stock's shortlisted based on above mentioned criteria's are further analysed as

- For each eligible stock, Z score is calculated on the basis of return on equity (ROE), debt-to-equity (D/E) ratio and EPS growth variability in the previous 5 years. Debt-to-equity ratio is not considered for companies belonging to financial services sector.
- Latest fiscal year data is considered for the calculation of return on equity (ROE) and debt-to-equity (D/E) ratio. EPS growth variability in previous 5 financial years is calculated using adjusted EPS of previous 6 years. Consolidated financial data is used wherever available else standalone financial data is taken into consideration.
- Z score of each parameter for each security is calculated as per following formula

$$(x - \mu) / \sigma$$

Where;

x is parameter value of the stock

μ is mean value of the parameter in the eligible universe

σ is std. deviation of parameter in the eligible universe

- EPS growth variability is not calculated for stocks with negative EPS in any of the previous 6 fiscal years. Such stocks are not considered for selection.
- In case of an IPO, company will be considered for selection, if adjusted EPS data is available to at least calculate EPS growth variability in previous 3 financial years.

- Weighted average Z score is calculated for all securities as per the following formula

For Non-Financial Service sector company:

Weighted Z score = $0.33 * \text{Z score of ROE} + 0.33 * - (\text{Z score of D/E}) + 0.33 * - (\text{Z score of EPS growth variability})$

For financial services sector:

Weighted Z score = $0.5 * \text{Z score of ROE} + 0.5 * - (\text{Z score of EPS growth variability})$

- Quality score is calculated for all eligible securities from the weighted average Z score as

$$\text{Quality Score} = (1 + \text{Average Z score}) \text{ if Avg. Z score} > 0$$

$$(1 - \text{Average Z score})^{-1} \text{ if Avg. Z score} < 0$$

- Top 30 stocks are selected based on quality-score.

Weights and Capping:

- Weight of the stock in the index is derived by multiplying the square root of the free float market cap with the quality score of that stock.
- Each stock in the index is capped at the lower of 5% or 5 times the weight of the stock in the index based only on free float Mcap.
- Capping will be done semi-annually at the time of rebalancing.

Reconstitution

- Index rebalancing will be done on a semi-annual basis.
- Stocks that moved out of the NIFTY 200 at the time of review shall also move out of the index
- Top 10 ranked stocks on the basis of quality score are compulsorily included in the index, whereas existing stocks in the index whose rank goes beyond 50 are compulsorily excluded from the index.
- Apart from the scheduled semi-annual review, additional ad-hoc reconstitution and rebalancing of the index shall be initiated in case any of the index constituents undergoes suspension or delisting or scheme of arrangement.
- Further, on a quarterly basis indices will be screened for compliance with the portfolio concentration norms for ETFs/ Index Funds announced by SEBI on January 10, 2019. In case of non-compliance, suitable corrective measures will be taken to ensure compliance with the norms.

Calculation Frequency:

The index is calculated online on all days that the National Stock Exchange of India is open for trading in equity shares and disseminated through trading terminals and website.

Index Governance:

A professional team at NSE Indices Limited manages the index. NSE Indices Limited has constituted the Index Advisory Committee (Equity), which provides guidance on macro issues pertaining to equity indices. The Index Maintenance Sub-committee makes all decisions on additions and deletions of companies in equity indices and Index Advisory Committee (Debt) provides guidance on macro issues pertaining to fixed income indices. The Committees comprises of representatives from financial market such as Asset Management Company, insurance company, rating agency etc. In order to maintain transparency, the names of the committee member are publicly displayed on the website. None of the member in the above committee except the exchange representative(s) (who co-ordinates between the Index Advisory Committee - Equity and IMSC) represent more than one committee and thereby the independence of each of the committees is maintained.

About Us

About National Stock Exchange of India Limited (NSE):

National Stock Exchange of India Ltd. (NSE) is the leading stock exchange in India and the second largest in the world by nos. of trades in equity shares from January to December 2018, according to World Federation of Exchanges (WFE) report.
