Index Methodology

The Nifty500 Equal Weight index aims to measure the performance of constituents forming part of the parent index, the Nifty 500 Index, where each company in the index will be assigned equal weights at the time of rebalancing.

- The index has a base date of April 01, 2005 and a base value of 1000.
- Stocks forming part / going to be a part of the Nifty 500 index at the time of review are eligible for inclusion in the index.
- Each stock in the index shall be equally weighted.
- The replacement of stocks in Nifty 500 (if any) is implemented from the last trading day of March and September
- Weightage of stocks in equal weighted indices are aligned equally at the time of change in the index composition in March and September
- Additionally, weightage will be aligned equally on a quarterly basis and implemented from the last trading day of March, June, September, and December
- In case there are multiple securities (e.g. DVR) of the same company in the index, the company will be equal weighted and the securities will be weighted in proportion to free float-adjusted market capitalization

- Index Governance: A professional team manages all NSE indices. There is a three-tier governance structure comprising the Board of Directors of NSE Indices Limited, the Index Advisory Committee (Equity) and the Index Maintenance Sub-Committee.
