$$\text{TRO} = \frac{\text{Aggregate Monthly Turnover}}{\text{Average free float during the month}} * 12$$

Average free float during the month

At the time of rebalancing of shares/ change in index constituents/ change in investable weight factors (IWFs), the weightage of the index constituent (wherever applicable) is capped at 15%. Weightage of such stock may increase beyond 15% between the rebalancing periods.

#### Exclusion Criteria:

During the review, the index constituent is excluded if TRO is less than 100% in 3 out of the previous 6 months. The total number of stocks which shall be replaced in a review shall be restricted to 4.

#### Index Re-Balancing:
