

SEPTEMBER 2026

Nifty Passive Insight

Monthly updates on ETFs
and Index Funds

Overview

Passive assets ended August 2026 at Rs.15.42 lakh crore, registering a 1.8% month-on-month (MoM) increase from Rs.15.15 lakh crore in July 2026. The rise was supported by net inflows of Rs.10,948 crore, which remained positive despite a bearish undertone displayed by the market.

Commodities emerged as a key driver of passive asset growth in August 2026, registering a sharp 10.2% expansion in assets to Rs.2.77 lakh crore from Rs.2.51 lakh crore in July 2026. Alongside inflows of Rs.3,867 crore into Gold and Silver ETFs, the increase was supported by rise in precious metal prices. This enabled commodity-oriented passive schemes to deliver a disproportionately high share of overall passive AUM growth.

Equity markets remained under pressure during August, with the benchmark Nifty 50 registering a fall of 1.14%. Despite this bearish pressure, equity passive assets inched up to Rs.10.76 lakh crore from Rs.10.71 lakh crore, supported primarily by inflows of Rs.9,630 crore.

Debt passive products moved in the opposite direction. Despite witnessing outflows of Rs.2,555 crore, debt AUM remained largely unchanged at Rs.1.89 lakh crore, aided by valuation gains that offset a part of the redemption impact.

Fund houses remained active on the product development front with 16 passive launches in August 2026, comprising 12 ETFs (10 Equity, 1 Commodity and 1 Debt) and 4 Index Funds (all Equity). The launch mix was overwhelmingly centred around equities. Passive adoption continued to deepen across the industry, with 35 of India's 52 AMCs offering passive products. Nearly two-thirds of the mutual fund industry has established a presence in the passive segment.

While equity-oriented products continued to lead new launches in August, the trend has been evident throughout FY27. Of the 57 passive products launched since April 2026, 45 were in the equity segment, compared with 7 debt, 4 hybrid and 1 commodity-oriented launch, highlighting the dominant role of equity strategies within the passive space.

Looking beyond asset classes, a concentration was also evident at the benchmark level, with products based on NSE indices accounting for 39 of the 57 passive launches between April and August 2026. The remaining launches were distributed across other index providers, and one product was a silver-based ETF.

With assets continuing to scale, issuer participation widening, benchmark ecosystems expanding and product launches remaining robust, the passive segment further strengthened its presence within the broader mutual fund landscape in August 2026.

About NSE Indices Limited

NSE Indices Limited (formerly known as India Index Services & Products Ltd. - IISL), a subsidiary of NSE, provides a variety of indices and index related services for the capital markets. The company focuses on the index as a core product. The company owns and manages a portfolio of indices under the Nifty brand of NSE, including the flagship index, the Nifty 50. Nifty equity indices comprise of broad-based benchmark indices, sectoral indices, strategy indices, thematic indices and customised indices. NSE Indices Limited also maintains fixed income indices based on Government of India securities, corporate bonds, money market instruments and hybrid indices. Many investment products based on Nifty indices have been developed within India and abroad. These include index based derivatives traded on NSE and NSE International Exchange IFSC Limited (NSE IX) and a number of index funds and exchange traded funds. The flagship 'Nifty 50' index is widely tracked and traded as the benchmark for Indian Capital Markets.
