PRESS RELEASE

LAUNCH OF CNX 100 EQUAL WEIGHT INDEX

In continuation of its efforts to develop indices that meet the requirements of market participants, IISL proposes to launch the CNX 100 Equal Weight Index.

The CNX 100 Equal Weight Index comprises of the constituents forming part of CNX 100 Index (free float market capitalization based Index). The constituents of CNX 100 Equal Weight Index are assigned equal weight of 1% at each periodic re-balancing (quarterly re-balancing and semi- annual review) of the Index. Under this methodology, every constituent would get an equal representation regardless of the size of each company in the Index.

Selection Criteria:

CNX 100 Equal Weight Index being a variant of CNX 100 Index, the selection criteria remains same as that of CNX 100 Index. The index comprises of the securities which are constituents of CNX Nifty and CNX Nifty Junior. Any changes i.e. inclusion and exclusion of securities in CNX Nifty and CNX Nifty Junior would automatically get mirrored in this index.

The index will be maintained by IISL and calculated on an end-of-day basis. The index will be launched with effect from June 10, 2013. The closing values of this index would be available on www.nseindia.com.

Place: Mumbai

Date: June 07, 2013
