

Press Release

Calculation of S&P CNX DEFTY Index based on Real Time Exchange

S&P CNX DEFTY Index is S&P CNX NIFTY, measured in US dollar terms. Currently DEFTY is computed based on S&P CNX NIFTY index and end of previous day Exchange Rate (US \$-Re). This exchange rate is used for DEFTY index value computation during trading hours.

With effect from 14th November 2005 it is proposed to compute S&P CNX DEFTY Index value based on Real time Exchange Rate (US \$-Re).

Place: Mumbai

Date : November 11, 2005
