

Tracks the performance of tourism stocks

September 2024

Introduction

“Atithi Devo Bhava” – a Sanskrit phrase meaning, ‘The guest is equivalent to God’, encapsulates the ethos of Indian hospitality and significantly influences the tourism industry in India. By embracing this, India aims to provide a warm and welcoming environment for tourists, thereby strengthening its position as a preferred travel destination. Tourism and Hospitality, being one of India’s largest service industries, plays an extraordinary role in driving the nation’s growth and prosperity. It helps promote and preserve India’s rich cultural heritage, traditions and historical sites. The growth of tourism stimulates the development of infrastructure such as transportation, accommodation, and recreational facilities. India proudly showcases a rich tapestry of geographical diversity, featuring breathtaking world heritage sites and unique tourism

offerings such as captivating cruise tourism, thrilling adventure tourism, spiritual tourism and enchanting eco-tourism. These unique offerings have resulted in an exponential increase in tourist arrivals, opening up vast employment opportunities. A thriving tourism industry enhances India’s global image, fostering international goodwill and cultural exchange, and promoting the country as a vibrant and diverse travel destination. Travel and tourism are two of the largest industries in India, with a total contribution of about US\$ 199.6 billion to the country’s GDP (Source: IBEF). Recognizing the importance of this sector’s contribution to the growth of the nation, the Nifty India Tourism index has been developed to provide investors a vehicle to invest in this theme.

About Nifty India Tourism

Nifty India Tourism index aims to track the performance of stocks from the Nifty 500 index which represent the travel and tourism theme. The largest 30 stocks from eligible basic industries are selected based on 6-month average free-float market capitalization. The weight of

each stock in the index is based on free-float market capitalization subject to a stock cap of 20%. Reconstitution of the index constituents is done semi-annually while rebalancing is carried out quarterly.
